

Repertorio bibliográfico Antonio Estandía

**Colección donada a la Biblioteca Sotero Prieto del Instituto de Matemáticas
de la UNAM**

Elaborado por

**Felipe Meneses Tello
Coordinador de la Biblioteca
Instituto de Matemáticas UNAM**

Ciudad de México, Ciudad Universitaria, 2019

Introducción

El proceso de organización de la colección bibliográfica de Antonio Estandía en la Biblioteca Sotero Prieto del Instituto de Matemáticas ha permitido que este acervo haya quedado debidamente registrado en los catálogos electrónicos del Sistema Bibliotecario Universitario y de la propia Biblioteca del Instituto. Uno de los objetivos esenciales ha sido integrar estos libros a la colección general para ponerlos a disposición tanto de la comunidad matemática del Instituto como de la comunidad matemática mexicana. Así, la Colección Antonio Estandía se organizó de acuerdo con el sistema de clasificación que usa el Sistema Bibliotecario de la Universidad Nacional Autónoma de México.

Como en los casos de las colecciones bibliográficas de Félix Recillas y Alejandro Montes, la finalidad de este repertorio bibliográfico es constatar documentalmente que todos los libros se procesaron bajo rigurosos estándares de organización bibliográfica. Los libros de esta colección se distinguen por el sello distintivo que imprime la leyenda ***Donado por Antonio Estandía***, misma que se estampó en algunas partes de estos libros.

Los registros del presente repertorio contienen los siguientes elementos: autor, título, lugar de publicación, nombre de la editorial, año de edición, número de clasificación, clave de la Biblioteca y número de adquisición. Si es el caso, se anota el número de edición y el número de ejemplares que tiene la Biblioteca. Así, de acuerdo con el proceso técnico realizado, la comunidad de usuarios puede solicitarlo en sala o a domicilio, pues todos estos libros presentan los números de clasificación y adquisición correspondientes. Elementos que han permitido generar los respectivos códigos de barra a cada obra con el propósito de facilitar el préstamo automatizado a los usuarios que tienen registro en la Biblioteca, individuales o institucionales. Los usuarios externos sin registro podrán consultar estos libros únicamente en la sala de lectura o para fotocopiar, siempre y cuando a juicio del personal bibliotecario se observe que el material resiste este proceso sin el riesgo de dañar la obra.

De 210 volúmenes en total, 118 fueron obras que la Biblioteca Sotero Prieto no tenía en su colección general de libros y a veces en ninguna otra biblioteca del Sistema Bibliotecario Universitario. En el caso de los libros duplicados, estos materiales posibilitan que por lo menos un ejemplar esté en estantería para consulta interna. De esta manera, la Colección Antonio Estandía ha enriquecido sustantivamente los fondos bibliográficos de la Biblioteca Sotero Prieto en particular y del Sistema Bibliotecario de la UNAM en general. Asimismo, con esta colección organizada al servicio de la comunidad se enriquece cuantitativa y cualitativamente el patrimonio bibliográfico matemático en México.

Finalmente, cabe mencionar que el trabajo de la organización física de esta colección la llevó a cabo el personal académico especializado en bibliotecología que labora en la Biblioteca del Instituto de Matemáticas, esto es, la Dra. Angélica Guevara Villanueva bajo la coordinación del Dr. Felipe Meneses Tello, quien además elaboró el presente repertorio bibliográfico.

El repertorio

1. Walsh, J. L.

Interpolation and approximation by rational functions in the complex domain. 5nd ed.

Providence, Rhode Island : American Mathematical Society, 1969.

QA281 W32 1969

GM-46588

2. Carathéodory, Constantin

Funktionentheorie

Basel : Verlag Birkhäuser, 1950.

QA331 C242 V. II

GM-46563

3. Lebesgue, Henri Léon

Leçons sur l'intégration et la recherche des fonctions primitives professées au Collège de France

Providence, Rhode Island : American Mathematical Society, 1973.

QA308 L43 1973b

GM-46712

4. Hill, Fredrick J.

Introduction to switching theory and logical design

New York : J. Wiley, 1974.

TK7868.S9 H54 1974

GM-46315

5. Anderson, Brian D. O.; Vongpanitlerd, Sumeth

Network analysis and synthesis

Englewood Cliffs, New Jersey: Prentice-Hall, 1973.

TK454.2 A535

GM-46589

6. Canales Ruiz, Roberto; Barrera Rivera, Renato

Análisis de sistemas dinámicos y control automático

México : Limusa, 1980.

TJ213 C34

GM-46715

7. Narendra, Kumpati S.; Taylor, James H.

Frequency domain criteria for absolute stability

New York : Academic Press, 1973.

QA402 N36

GM-46316

8. Spivak, Michael

Calculus on manifolds : a modern approach to classical theorems of advanced calculus
New York : W.A. Benjamin, 1965.
QA303 S789 Ej. 3
GM-46317

9. Braun, Martin
Differential equations and their applications : An introduction to applied mathematics
New York : Springer Verlag, 1975.
QA371 B72
GM- 46714

10. Dugundji, James
Topology
Boston : Allyn and Bacon, 1966.
QA611 D8 Ej. 4
GM-46318

11. Lefschetz, Solomon
Differential equations : Geometric theory. -- 2nd ed.
New York : Dover, 1977.
QA371 L37 1977 Ej. 2
GM-46342

12. Williams, David
Probability with martingales
Cambridge : Cambridge University Press, 1991.
QA273 W536 Ej. 3
GM-46343

13. Varadhan, S. R. S.
Lectures on diffusion problems and partial differential equations
Berlin : Springer Verlag, 1980.
QA374 V36
GM-46344

14. Mitter, Sanjou K.; Moro, Antonio (Eds.)
Nonlinear filtering and stochastic control : Proceedings of the 3rd 1981 session of the centro internazionale matematico estivo (c. i. m. e.), held at cortona, july 1-10, 1981
Berlin : Springer Verlag, 1982.
QA274.23 N65 Ej. 2
GM-46345

15. Feller, William
An introduction to probability theory and its applications. Vol. I
New York : J. Wiley, 1966-1971
QA273 F44 1966 VI
GM-46346

16. Feller, William

An introduction to probability theory and its applications. Vol. II

New York : J. Wiley, 1966-1971

QA273 F44 1966 V II Ej. 2

GM-46347

17. Bieberbach, Ludwig

Lehrbuch der funktionentheorie. Volume II, complete. 2nd ed.

New York : Chelsea, 1965.

QA331 O86 1965 VII

GM-46672

18. Hausdorff, Felix

Grundzuge der mengenlehre

New York : Chelsea, 1949.

QA248 H34 Ej. 3

GM-46348

19. Kailath, Thomas

Linear systems

Englewood Cliffs, N. J. : Prentice Hall, 1980.

QA402 K315

GM-46349

20. Wong, Eugene

Stochastic processes in information and dynamical systems

New York : McGraw-Hill, 1971.

TA168 W65

GM-46350

21. Strejc, Vladimír

State space theory of discrete linear control

Chichester, UK : John Wiley & Sons, 1981.

QA402.3 S79

GM-46351

22. Yoshida, Kosaku

Functional analysis . -- 6th ed.

Berlin : Springer Verlag, 1980.

QA320 Y65 1980 Ej. 2

GM-46352

23. Billingsley, Patrick

Probability and measure

New York : John Wiley & Sons, 1979.

QA273 B487 Ej. 2

GM-46353

24. Schuss, Zeev
Theory and applications of stochastic differential equations
New York : John Wiley & Sons, 1980.
