

MATH 115 - SEC 011, WINTER 2011. QUIZ 0
TIME LIMIT: 15 MINUTES

INSTRUCTOR: GERARDO HERNÁNDEZ

Good luck!

- (1) Math 105 is graded on a normal 10-point scale, that is 90-100=A, 80-90=B, etc.

False. We do not use the "10-point scale" often seen in high school courses in which scores in the 90's get an A, in the 80's get a B, and so forth; the level of difficulty of the exams will be considered.

- (2) In general, a student should expect to do well in this course if he/she completes all assignments, reads each section before class, and puts in 3-4 hours of study time a week.

False. This course requires a solid effort. The faculty at the University of Michigan expects you to study a minimum of two hours outside class for each credit hour, which means that we expect you to spend at least eight hours a week outside of class working on mathematics.

- (3) In-class work (i.e., team homework and quizzes) accounts for 40% of your overall course grade.

False. This is part of the section component.

- (4) Each member of the team should submit his/her own version of the solutions for the team homework every week.

False. The scribe is responsible for writing up the single final version of the homework to be handed in.

- (5) If you do not participate in team homework and quizzes, your course grade will be based solely on your exam scores and web homework.

False. Your instructor will decide how the section component is determined for your particular section and grade the section work.

- (6) My grade won't be affected if I don't pass the Gateway test by September 29.

False. If you don't pass it by the deadline, your grade will be affected by 1/3 of a letter grade.

- (7) If you do not complete a WebHW assignment by the deadline, you can finish it within the following day for partial credit.

False. You need to finish it by the deadline.

- (8) If you are trying hard in the course and completing all of the work, but your in-class grades are lower than your uniform exam grades, your course grade can be lowered by a full letter grade.

False. If, at the end of the term, your rankings on the section component and uniform component differ significantly from one another, your course grade will be examined to see if an adjustment should be made. If you have participated in section activities but your section component is significantly lower than your uniform grade, your course grade may be lowered by one third of a letter grade.

- (9) I can take the gateway test only one time per day.

False. You may practice each test online as many times as you like, and you may take a test for a score as often as twice per day without penalty until the deadline

- (10) At the end of the semester, every section of Math 105 will have the same number of A's, B's, etc.

False. Each section can be different.

(Recall that you earned 4 points for this quiz IF you completed the student data form online.)
